

SESSION 2022-23

A SESSION WITH DON NORMAN

DATE: 11 FEBRUARY, 2023

MODE: ONLINE

The special pre-event for Eclipse 3.0 marked the exciting beginning of this flagship event with a notable guest of honour. **Don Norman**, often recognised as the Father of UX Design, is a distinguished American researcher, author, and professor. He was the **Vice President at Apple and played a significant role in shaping its future**. As the individual who introduced the term 'user experience' to the world, his participation added significant value to this occasion.

The special webinar, scheduled for 10th February at 10 p.m., promised to be an enlightening and inspiring experience for all attendees. The limited seats available for the webinar were intentionally designed to ensure an interactive and engaging session.

This pre-event set the stage for Eclipse 3.0, emphasising the importance of starting an event on the right note. Don Norman Sir's insights and expertise in the field of UX design were expected to offer valuable takeaways for the audience. This session provided a unique opportunity for participants to gain knowledge, engage with an industry luminary, and be part of an exclusive and insightful experience.

CONCLUSION:

The special pre-event featuring Don Norman signified a significant milestone in the lead-up to Eclipse 3.0, underscoring the event's commitment to delivering high-quality content and interactive experiences to its participants. It is a momentous occasion that set the tone for what went on to be an exceptional flagship event.

About Sir Don Norman

Post Doctoral Fellow
and Instructor
Harvard University
1962 - 1966 · 4 yrs

Vice President
Apple Computer
1993 - 1998 · 5 yrs

Co-Founder and Board member
Nielsen Norman Group
1998 - Present · 25 yrs 11 mos

ECLIPSE 3.0

DATE: 6-9 APRIL, 2023

MODE: OFFLINE

ECLIPSE 3.0, organised by the Thapar ACM Student Chapter, stands as the pinnacle of tech events, and its third edition promises an unforgettable experience for technology enthusiasts. This multifaceted event features a lineup of compelling sub-events, including Kaggle War, Flamingo, Enigma, and Hacklipse, catering to a diverse audience of developers, designers, data scientists, and security experts.

ECLIPSE 3.0 is designed to offer an enriching experience for attendees, combining learning, networking, and collaboration with like-minded professionals from all corners of the country. It represents a unique opportunity to immerse oneself in the world of technology and innovation, providing a platform for individuals to expand their knowledge and connect with others who share their passion.

This year, ECLIPSE 3.0 transports participants to "EGYPT 2.0," a futuristic reinterpretation of ancient Egypt. This captivating theme merges the grandeur of pyramids and temples with cutting-edge architectural and engineering advancements, creating a world where history and innovation coexist in perfect harmony. Attendees will witness the fusion of traditional art and design with state-of-the-art digital technologies, offering a glimpse into a future where the past and the future converge.

The event is a journey into a world where majesty meets technology, where the beauty of ancient Egypt is reimagined with the latest advancements. It's an exploration of how the wonders of the past and the promises of the future can coexist in perfect synergy.

ECLIPSE 3.0 promises to be an electrifying event filled with opportunities for learning, networking, and, most importantly, fun. It's a testament to the ever-evolving landscape of technology and the boundless possibilities that await those who dare to explore it.

ENIGMA

DATE: 6-9 APRIL, 2023

MODE: OFFLINE

Enigma is a competitive programming event that revolves around testing the participants' problem-solving skills and coding abilities under strict time constraints. This contest is designed to challenge their logical thinking, competitive nature, and coding proficiency.

Participants in Enigma will tackle a series of intricate problems that demand quick and efficient solutions. It's a contest where your coding skills will be put to the test, and your ability to think on your feet will be crucial.

Enigma is the arena where the participants face off against other coding enthusiasts, and it's not just about writing code; it's about outsmarting one's peers with analytical skills and adaptability. In Enigma, participants dive deep into the world of algorithms, data structures, and mathematical concepts, aiming to solve complex problems efficiently.

Organising the Enigma competitive programming event presents a myriad of advantages:

- **Skill Development:** Enigma provides participants with an opportunity to enhance their problem-solving and coding skills. It encourages them to think critically, logically, and analytically to solve complex programming challenges.
- **Community Building:** Enigma brings together like-minded individuals who share a passion for programming and coding. It creates a sense of community among participants, allowing them to connect, collaborate, and learn from each other.
- **Networking:** Conducting Enigma can serve as a platform for participants to network with peers, mentors, and professionals in the field of computer science and programming. This can open up opportunities for future collaborations and career advancements.
- **Academic Enhancement:** Enigma can complement academic studies by applying theoretical knowledge to practical programming challenges. It reinforces classroom learning and deepens understanding of algorithms and data structures.

Start time
06-Apr-23
(09:00 PM IST)

End time
06-Apr-23
(11:30 PM IST)

Duration:
2 hours

Who can participate:

The contest is open to all the students from all across the country. Everyone from freshers to professionals can participate.

About the Contest:

Welcome to Enigma! This is an exciting opportunity for skilled coders to showcase their abilities and compete against other talented individuals. Our contest is designed to challenge participants with a series of coding problems that will test their knowledge of algorithms, data structures, and other important programming concepts.

There will be a time limit for participants to finish as many of the coding challenges as they can. The objective is to maximize efficiency and correctness while resolving as many issues as you can. The competitors who received the most accurate answers will be declared the competition's champions.

In addition to the satisfaction of solving challenging problems, there are also great prizes to be won! Our top-performing participants will be awarded with prizes above 8.5 lakhs and certificates.

This competition is a great chance to show off your coding prowess, push yourself, and network with other programmers. Join us for this interesting event whether you're a student, professional, or just someone who enjoys coding. Prepare to compete, have fun, and code!

Hacklipse

DATE: 8-9 APRIL, 2023

MODE: OFFLINE

Hacklipse, a 24-hour hackathon organised by ACM Thapar Student Chapter, offers a unique platform for individuals to showcase their programming skills and unleash their creativity. This event caters to a diverse range of participants, from seasoned programmers to complete beginners.

At Hacklipse, participants are provided with a well-defined problem statement and the support of a like-minded community, making it an ideal environment for generating innovative ideas that have the potential to make a significant impact. The hackathon is a fantastic opportunity to test and expand your coding abilities.

Moreover, this event encourages participants to network with professionals and engage with fellow hackers throughout the 24-hour duration. It's a valuable opportunity to learn new coding skills, collaborate with peers, and gain insights from experts in the field.

Applications submitted during Hacklipse are evaluated by a panel of experts who assess their originality, feasibility, and creativity. This evaluation process adds a layer of competitiveness to the event, where teams strive to produce the most innovative and viable solutions.

For those who excel, Hacklipse offers not only recognition for their outstanding work but also attractive rewards. It's not just a hackathon; it's an opportunity to challenge oneself, collaborate with others, and make a mark in the world of programming and problem-solving.

Here are the benefits associated with hosting Hacklipse:

- **Skill Enhancement:** Hacklipse allows participants to sharpen their coding, problem-solving, and innovation skills in a focused and intense environment.
- **Innovation Incubator:** The event serves as an incubator for innovative ideas, encouraging participants to think creatively and develop practical solutions.
- **Community Engagement:** Hacklipse fosters a sense of community among participants, creating a platform for like-minded individuals to connect and collaborate.
- **Professional Networking:** The hackathon provides an opportunity for participants to network with professionals, mentors, and experts in the tech industry, potentially opening doors to future career prospects.

- **Rapid Learning:** Participants get to explore and learn about new coding skills, technologies, and trends within a short timeframe, which can be a significant learning experience.
- **Problem-Solving:** Hacklapse emphasises practical problem-solving, enabling participants to address real-world issues through technology and innovation.
Showcasing Talent: The event showcases the talents and creativity of participants, offering recognition for their work and innovative solutions.

FLAMINGO

DATE: 7 APRIL, 2023

MODE: ONLINE

Flamingo, proudly announced by the Thapar ACM Student Chapter, is a design competition that aligns with the idea that "Design is the intermediary between information and understanding," as articulated by Richard Grefé. This competition provides a creative platform for aspiring designers worldwide to come together, participate, compete, and express the notion that design is not just functional; it is art, aesthetics, simplicity, and complexity blended into one.

Key Details of Flamingo:

- **Team Size:** Flamingo invites teams of 1 to 3 members, allowing both individual and collaborative creativity to flourish.
- **Commencement:** The competition kicks off at 5 p.m. on the 7th of April, with the revelation of the problem statement. This start time signifies the beginning of the creative journey for participants.
- **Deliverables:** Participants are required to provide a comprehensive PDF containing brand guidelines, logo, font choices, and a colour palette. They must also produce both printable and digital designs. Printable designs encompass various elements such as advertisement posters, billboards, brochures, business cards, or branded packaging. Digital designs include social media posts, stories, and a choice between UI/UX design or a promotional video.
- **Submission Deadline:** The final submission deadline for Flamingo is set for the 8th of April, and all submissions will be collected on Devfolio, the designated platform for the competition.
- **Judging Criteria:** Designs submitted to Flamingo will be assessed based on their creativity, originality, and adherence to the designated theme. This emphasises the importance of innovative and unique design solutions.
- **Code of Conduct:** The organising team maintains the right to disqualify any participant found engaging in behaviour deemed inappropriate, ensuring a fair and respectful environment for all.

CONCLUSION:

Flamingo is more than a design competition; it is a celebration of the artistry and diversity of design. With its emphasis on creativity, adherence to the theme, and the opportunity to explore various design elements, it promises to be an engaging and inspiring challenge for aspiring designers from around the world. The competition encourages the belief that design is the bridge between information and understanding, where aesthetics and functionality converge to create impactful and beautiful solutions.

KAGGLE-WARS

DATE: 8-9 APRIL, 2023

MODE: ONLINE

Kaggle Wars, organised by ACM as part of Eclipse 3.0, is a prominent machine learning competition conducted at Thapar Institute of Engineering and Technology. This competition takes place on the renowned Kaggle platform, offering a challenging environment for participants to showcase their machine-learning expertise and problem-solving skills.

Key Details of Kaggle Wars:

- **Duration and Team Size:** Kaggle Wars spans over 72 hours, and teams can consist of 1 to 3 participants. This flexible team size allows both individual and collaborative efforts in tackling the competition.
- **Online Mode:** The competition is conducted entirely online, commencing at 12 am on 10th April. Participants engage in the competition through Kaggle, and their progress and solutions are presented in a digital format.
- **Single Problem Statement:** Kaggle Wars features a single, well-defined problem statement that participants must address using machine learning techniques, fostering a focused and competitive environment.
- **Judging Criteria:** The primary criterion for evaluating participants' performance is their accuracy on the Kaggle leaderboard. This metric emphasises the importance of achieving accurate and effective machine learning models.
- **Submission Limits:** Participants are allowed a maximum of 10 submissions per day, encouraging thoughtful experimentation and refinement of their models throughout the competition.
- **Final Presentations:** The top three performing teams in Kaggle Wars will be required to deliver presentations in front of an expert panel. Their scores and presentation quality will determine their final rankings.
- **Organizing Team Authority:** All decisions made by the organising team are considered final, and no further changes to the rules will be entertained. The organising team maintains the authority to modify any of the competition rules as deemed necessary due to unforeseen circumstances.

CONCLUSION:

Kaggle Wars within Eclipse 3.0 is a rigorous machine learning competition with well-defined rules and evaluation criteria. It offers a valuable opportunity for participants to apply their

machine learning skills and compete in a highly regarded online platform, Kaggle. The competition structure, judging criteria, and the final presentation round make it a comprehensive and engaging challenge for participants.

CODE SPRINT

DATE: 26 MARCH, 2023

MODE: ONLINE

CODESPRINT, organised by the ACM Student Chapter, is set to return for its third edition, promising a dynamic and enriching intra-society event. Taking place over a span of 6 hours, CODESPRINT is an event that fully lives up to its name and the anticipation surrounding it. The event is designed to deliver not only an exhilarating experience but also opportunities for new learning and skill acquisition.

CODESPRINT encompasses a diverse range of tech-related activities, making it a comprehensive destination for anyone interested in the world of technology. From mini-hackathons that encourage participants to solve real-world problems with innovative solutions to machine-learning workshops that delve into the intricacies of this transformative field, CODESPRINT offers a platform to learn and apply skills in a practical and competitive setting.

Competitive programming competitions are also a significant part of CODESPRINT, attracting those who thrive on challenging problem-solving and coding. This diverse array of activities caters to a wide spectrum of tech enthusiasts, providing a holistic learning experience and fostering an environment of collaboration and competition.

Conducting CODESPRINT offers several strong benefits:

- **Skill Enhancement:** CODESPRINT provides participants with an opportunity to enhance their technical skills, problem-solving abilities, and coding proficiency. It challenges participants to think critically and apply their knowledge to real-world scenarios, fostering skill development.
- **Innovation and Creativity:** The event encourages innovative thinking and creativity as participants tackle coding challenges and come up with unique solutions. This fosters a culture of innovation and creative problem-solving within the tech community.
- **Community Building:** CODESPRINT brings together tech enthusiasts, both novices and experienced individuals, to collaborate, compete, and learn from one another. It creates a sense of community within the ACM Student Chapter and beyond, strengthening connections among participants.
- **Practical Learning:** The event provides a practical learning environment, allowing participants to apply their knowledge in a competitive setting. This hands-on experience is invaluable for reinforcing classroom learning and gaining practical insights.
- **Networking and Collaboration:** CODESPRINT facilitates networking with peers and professionals in the tech industry. It offers opportunities for collaboration, idea sharing,

and potential career prospects as participants interact with like-minded individuals and experts.

CONCLUSION:

CODESPRINT is more than just an event; it's an opportunity for individuals to immerse themselves in the world of technology, whether they are seasoned tech enthusiasts or newcomers. The event combines the thrill of competition, the excitement of learning, and the joy of sharing in the camaraderie of like-minded individuals, making it a significant and eagerly anticipated fixture on the tech event calendar.

BOOTCAMP

MODE: HYBRID

User Interface and Experience Design (UI/UX) Boot Camp:

The UI/UX Boot Camp was a dedicated training program with the goal of instructing and equipping members in the fundamental principles of design, user interface (UI) design, and user experience (UX) design. This comprehensive initiative also aimed to empower participants with the skills necessary for the software development process. Notably, participants were given the opportunity to create UI designs and refine the UX for ongoing projects within the ACM community. The boot camp successfully engaged 25 participants, and its seamless execution was overseen by a committed organising committee of 2 members.

CHIBI ROBOT made during bootcamp

App Development Boot Camp:

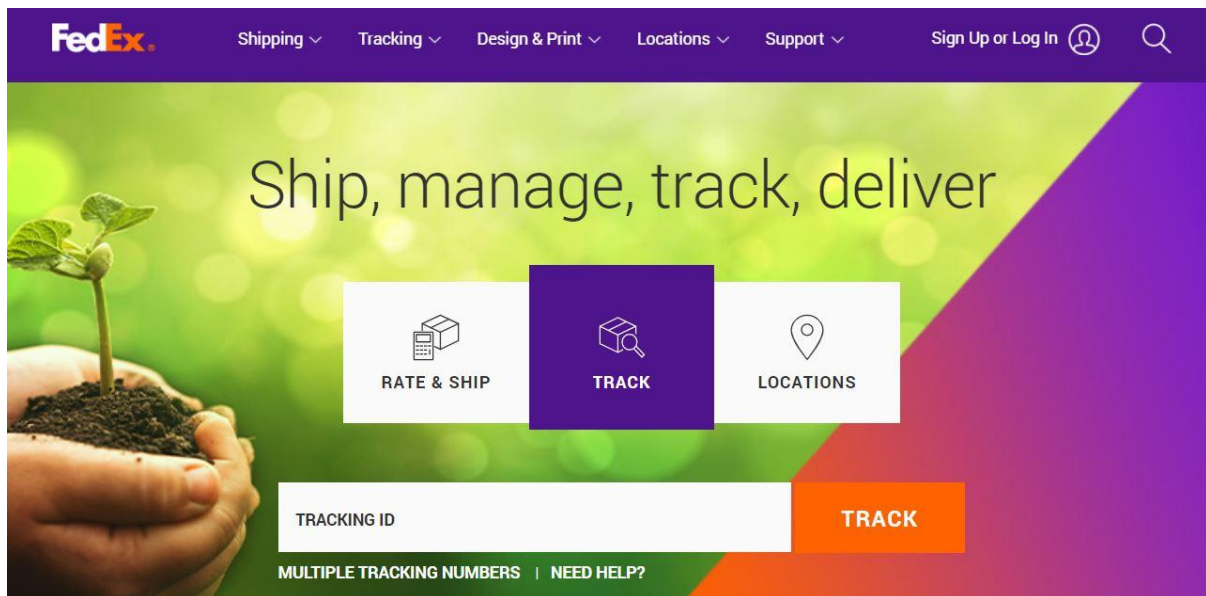

The App Development Boot Camp focused on educating and training members in app development principles, with a special emphasis on Flutter and Daft technologies. This program sought to provide participants with the essential skills required throughout the software development process. As a notable outcome, participants gained the ability to independently create their own Flutter-based applications from the ground up. The event attracted 15 enthusiastic participants and was efficiently managed by a 2-member organizing committee.

BMI APP made during bootcamp

Web Development Boot Camp:

The Web Development Boot Camp aimed to train members in web programming, emphasizing client-server architecture and database management principles. The boot camp was designed to equip participants with the requisite skills for the software development process. Throughout this initiative, participants embarked on a learning journey by creating their own websites and contributing to projects that utilized the MERN (MongoDB, Express.js, React, Node.js) stack. A remarkable 40 participants actively engaged in the boot camp, and the seamless execution of the event was overseen by a 2-member organizing committee.

ACADEMIC CLASSES

MODE: OFFLINE

ACM's Academic Classes represent a valuable educational initiative aimed at fostering a collaborative learning environment within the organization. These classes are designed to facilitate knowledge sharing, particularly in the area of Data Structures and Algorithms (DSA).

In these classes, experienced seniors who have demonstrated proficiency in DSA take on the role of educators and mentors. They impart their expertise by teaching DSA principles and strategies, providing a comprehensive understanding of various approaches to problem-solving. An integral aspect of these classes is the live demonstration of problem-solving techniques on platforms like LeetCode, where students can observe real-time problem-solving in action.

The Academic Classes offer numerous benefits, including:

- **Knowledge Transfer:** Seniors share their knowledge and experience in DSA, helping junior members grasp key concepts and problem-solving techniques.
- **Interactive Learning:** The live sessions encourage active participation and engagement, allowing participants to ask questions, seek clarifications, and receive immediate feedback.
- **Problem Solving:** The classes provide a practical avenue for members to apply DSA concepts to solve real-world problems, enhancing their problem-solving skills.
- **Collaborative Environment:** These classes foster a sense of community and collaboration within ACM, where members can learn from each other and build a support network.
- **Practical Experience:** Participants gain hands-on experience by tackling LeetCode questions in real-time, which is a valuable skill for technical interviews and competitive programming.

The Academic Classes organized by ACM serve as a testament to the organization's commitment to knowledge-sharing and skills development. They facilitate a transfer of knowledge from experienced seniors to junior members, enhancing the overall technical expertise within the ACM community. These classes represent an integral part of ACM's educational initiatives and contribute to a culture of continuous learning and growth.

SESSION 2021-22

UI/UX BOOT CAMP

14 February to 27 April, 2022

This Boot Camp aimed at teaching and training members in the principles of design, use interface design, and use experience design, as well as helping them build the skills needed during the software development process. Members were able to design User Interface and refine UX for ongoing ACM Projects from scratch. The total participants were 25 and number of members in the organizing committee was 2.

APP-DEVELOPMENT BOOT CAMP

15 March to 1 May 2022

This Boot Camp aimed at teaching and training members in app development principles, flutter, and daft, as well as supporting them in acquiring skills essential during the software development process. Members were able to create their own Flutter Based apps from scratch. The total participants were 15 and number of members in the organizing committee was 2.

WEB-DEVELOPMENT BOOT CAMP

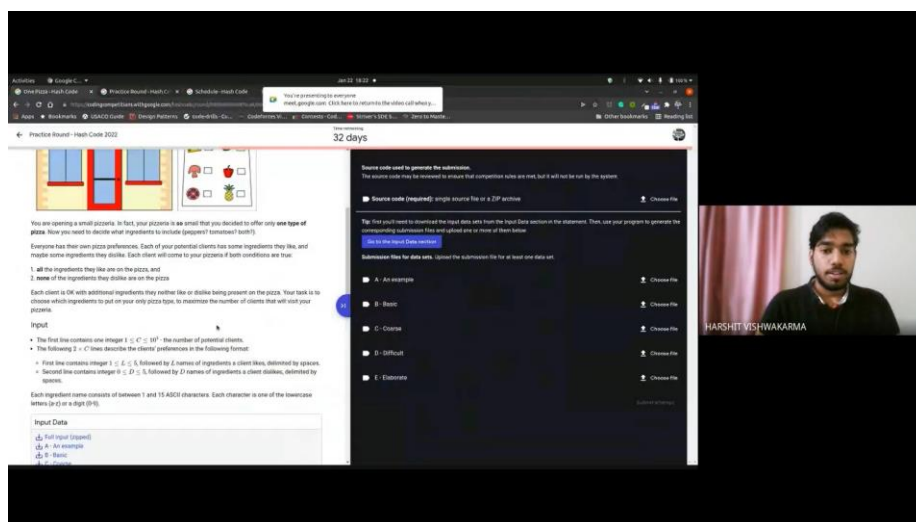

15 March to 1 May 2022

The aim of this Boot camp was to train members in web programming, client-server architecture, and database management principles, as well as assisting them in developing the skills required during the software development process. Members learnt client-server architecture by creating their own websites and contributing to projects using the MERN stack. The total participants were 40 and number of members in the organizing committee was 2.

WORKSHOP ON GOOGLE HASH CODE

26 January 2022

Thapar ACM Chapter conducted a Live Coding Session on Google Hash code 2022 Practice session to give its members and freshers a head-start in the Approximation based contests. Members were introduced with maps, set, pairs and general idea to approach any coding problem. Harshit Vishwakarma, member of ACM, secured 1st Position in Thapar University and AIR 52 in Google Hash Code 2022. The total participants were 45 and number of members in the organizing committee was 4.

Session by Priya Vajpayee, SDE 2, Adobe

25 Feb, 2022

An interactive session on "Placement Readiness" was hosted by Priya Vajpayee, a software engineer at Adobe. Students were able to gain meaningful insights from the industry expert and got their doubts cleared on placements. The total participants were 60 and number of members in the organizing committee was 14.

Priya's Experience

Member of Technical Staff 2
Adobe
2 yrs 5 mos
Noida, Uttar Pradesh, India

Technology Analyst
Morgan Stanley · Internship
Feb 2020 - Jul 2020 · 6 mos
Mumbai · On-site

ENIGMA

25 Feb, 2022

A competitive programming open event for college students was organised that tested the ability of students to perform under pressure and put ideas into action to create innovative and effective solutions. The total participants were 200 and number of members in the organizing committee was 25.

HACKLIPSE

26 February to 27 February 2022

Hacklipse was an open for all 24- hour virtual hackathon. It allowed students to upskill their coding skills and brainstorm ideas to develop innovative solutions for the case studies we provided to them. Students were able to build projects on their own, pitch their ideas to sponsor companies and also won exciting internship opportunities. The total participants were 300 and number of members in the organizing committee was 25.

FLAMINGO

26-27 February 2022

A designing event wherein the participants were given a case study, and were enquired to make a brand for the same in a time- sensitive environment. Winners received internship opportunity from International Design Company, Acuity Studios. The total participants were 160 and number of members in the organizing committee was 25.

WORKSHOP ON BROWSER SECURITY

8 May 2022

A browser security session was organised to learn how corporations can track use metrics, abuse user data, and what steps we can do to prevent and enhance our security. This time the total participants were 35 and number of members in the organizing committee was 2.

WORKSHOP ON GIT AND GITHUB

8 May 2022

A session on the fundamentals of git and GitHub, and how we may use these tools to boost team and individual productivity, as well as how to interact in the field of open source development to generate better code was held. The total number of participants was 35 and the number of members in the organising committee was 2.

WORKSHOP ON BRANDING AND IDENTITY DESIGN

10 May 2022

A workshop on Branding, teaching members how to create and develop their personal brands and identity was held. The total number of participants was 25 and the number of members in the organising committee was 4.

CODE SPRINT

8 May 2022

It was a 6-hour event where teams came together to code and finish their project within the defined deadlines. Members successfully completed three projects, namely WhatsApp Bot, Hand Tracker, Spotify Clone, & Event Website. The total number of participants was 50 and the number of members in the organising committee was 11.

ACM ACADEMIC CLASSES ON CP

March to 5 May 2022

A series of CP & DSA intra-society classes were taken by the batch of 2023 and 2024. Members learnt the concepts of Competitive Programming and attained 2 – 3 stars on CodeChef.

In these classes, experienced seniors who have demonstrated proficiency in DSA take on the role of educators and mentors. They impart their expertise by teaching DSA principles and strategies, providing a comprehensive understanding of various approaches to problem-solving. An integral aspect of these classes is the live demonstration of problem-solving techniques on platforms like LeetCode, where students can observe real-time problem-solving in action.

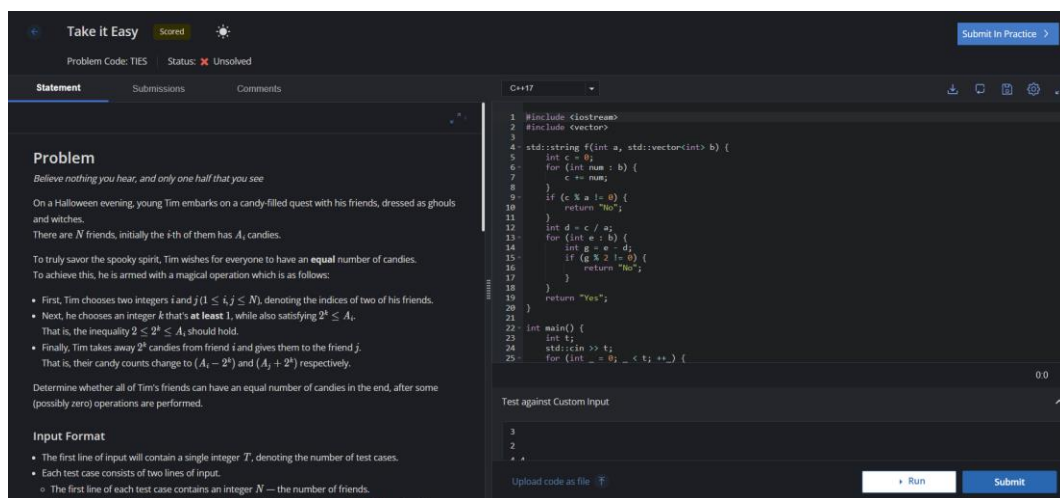

SESSION 2020-21

ECLIPSE

November 20, 2020 to November 22, 2020

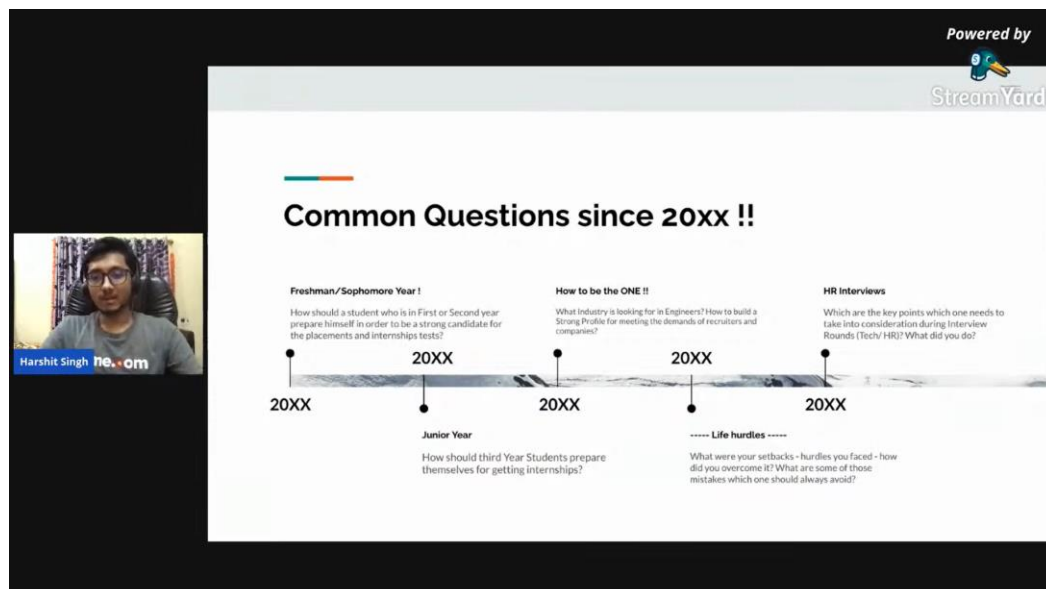

The event included:

- **Competitive coding contest**

The screenshot shows a competitive coding platform interface. On the left, the problem statement is titled "Take it Easy" and is marked as "Solved". The problem description involves a Halloween-themed quest where candies are distributed among friends. The input format specifies the number of test cases and the number of friends per case. On the right, a C++17 code snippet is shown, which implements a solution to the problem. The code includes headers for `<iostream>` and `<vector>`, and uses a loop to process each test case, calculating the number of candies and checking if they can be distributed equally.

- **A guest Lecture**

The screenshot shows a guest lecture slide titled "Common Questions since 20xx !!". The slide is presented by Harshit Singh, as indicated by the video feed in the bottom left corner. The slide content is organized into three main sections, each with a timeline marker for "20XX":

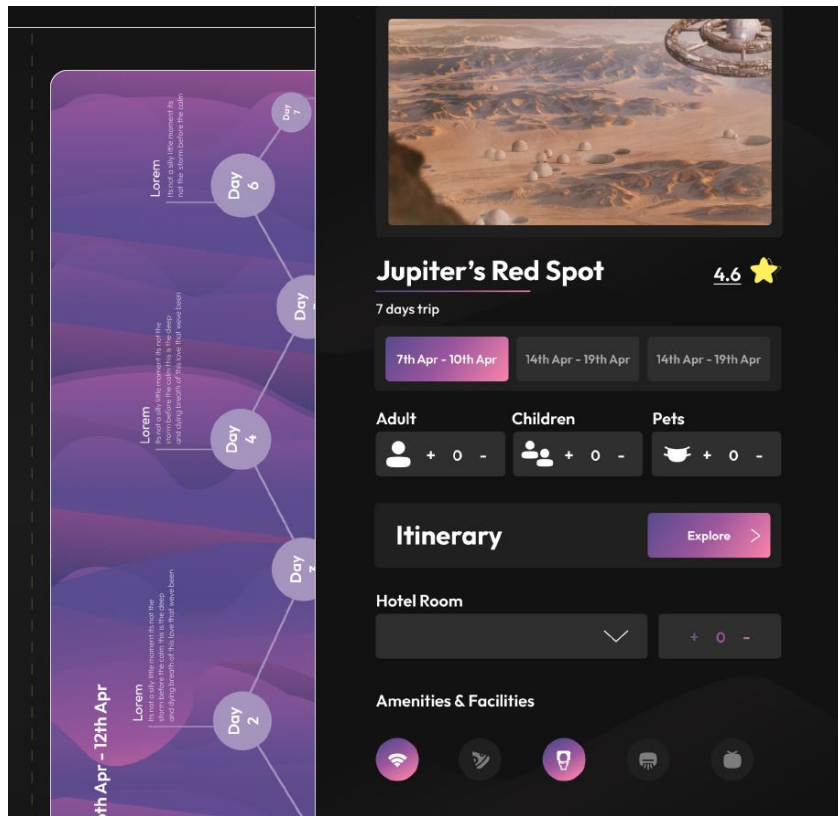

- Freshman/Sophomore Year!**: How should a student who is in First or Second year prepare himself in order to be a strong candidate for the placements and internships tests?
- How to be the ONE !!**: What industry is looking for in Engineers? How to build a Strong Profile for meeting the demands of recruiters and companies?
- HR Interviews**: Which are the key points which one needs to take into consideration during Interview Rounds (Tech/HR)? What did you do?

Below these sections, there are two additional questions:

- Junior Year**: How should third Year Students prepare themselves for getting internships?
- Life hurdles**: What were your setbacks - hurdles you faced - how did you overcome it? What are some of those mistakes which one should always avoid?

The slide is powered by StreamYard, as indicated by the logo in the top right corner.

- **UI/UX competition**

- **Hackathon**

The total number of participants was 200 and the number of members of the organising committee was 20.

Attendance Record

Chiranjiv Singh	Malhi	Thapar University
Souvik	Kangsa Banik	University of Engineering & Management, Kolkata
Aryan	Julka	Thapar University
Rahul	Lokhande	S.K. Somaiya Degree College
Vivaan	Taneja	Thapar University
Jai	Madhukar	Thapar University
Kaustav	Roy	University of Engineering & Management, Kolkata
Zeehan	Sheikh	School of Planning and Architecture Bhopal
Piyul	Patel	Ramrao Adik Institute of Technology
Riya	Sachdeva	Thapar University
ankan	Acharya	University of Engineering & Management, Kolkata
Abhisheak	Khurmi	Baba Farid College of Engineering and Technology

Devansh	Vora	Government Engineering College Sector-28

SPECTRA

March 19, 2021 to March 21, 2021

The event included:

Competitive coding contest (with brainstorming questions) .The benefits and impact of SPECTRA and similar competitive coding events are multifaceted and far-reaching.

- **Skill Enhancement:** Competitive coding events like SPECTRA challenge participants with a wide range of algorithmic and data structure problems. To succeed in these competitions, participants need to continually improve their coding skills, problem-solving abilities, and algorithmic thinking. This intense practice and problem-solving experience significantly enhance the coding skills of participants, making them better programmers in the long run.
- **Problem Solving:** SPECTRA's problem statements are carefully designed to test a coder's ability to break down complex problems into smaller, manageable parts. Participants learn how to approach problems systematically, analyze the requirements, and design efficient algorithms to solve them. This problem-solving skill is invaluable in both academic and professional settings.

ACM CLASSES

October 26, 2020

Regular Competitive coding classes, Practice Questions, Quizzes and practice contests were the major highlights of the event.

All the participants were ACM Members only and the number of members in the organising committee was 15.
